Vikash Kumar Khunte

Full Stack Developer | SDE | vikashkk.com

➢ Profile

Turning ideas into modern, scalable web applications as a TypeScript-focused Full-Stack Developer. My work spans across Frontend, Backend, Databases, SEO, and basic DevOps. Currently exploring microservices and distributed system architecture.

➢ Work Experience (2y+)

• Orinson Technologies | Full Stack Web Developer

Sep 2024 - Current, On-Site, Raipur India

Built scalable frontend and backend features using Next.js, React, Node.js, Express, and MongoDB, with basic DevOps exposure including Docker, CI/CD, AWS, Cloudflare, Linux, and Nginx.

• Fujairah Research Center | SDE - Freelancer

Feb 2024 – Aug 2024, Remote, Fujairah UAE

Worked with a global remote team to develop web applications using React, Next.js, and Node.js, contributing to dashboards, inventory and asset management, lab workflows, APIs, performance improvements, and feature enhancements.

➢ Projects

• Kairla : E-commerce platform for Fashion Product

Built a scalable fashion e-commerce platform at Orinson Technologies, working on product management, smooth shopping flows, performance optimization, and secure backend APIs using Next.js, React, Redux Toolkit, Node.js, Express, MongoDB, AWS, and Nginx.

• AI-LIMS : Laboratory Information Management System

Contributed to the development of a Laboratory Information Management System (AI-LIMS) at Fujairah Research Center, working on dashboards, lab workflows, and data management using Next.js, React, Node.js, Express, MySQL, Azure, and Nginx.

• Premisin : Office Space Provider in Raipur

Independently developed an office space provider website at SJAIN Ventures, showcasing flexible and fully managed workspaces with a clean UI and seamless inquiry flow using Next.js, React, HubSpot Forms, and SEO best practices.

• Experteeth : Dental Care – Dr. Manish Agrawal

Developed a professional dental clinic website for Experteeth, focusing on clear service presentation, patient-friendly UI, smooth navigation, and online appointment booking using Next.js, React, Node.js, Express, and MongoDB.
